Macron and Identity Politics After the Popes Agreement - Unidirc F. Neobide 2020-12-23 This book explores issues of national identity, history, and language in light of the 2020 Popes Agreement. The chapters examine the social, political, and economic conditions and events that led to the agreement and the implications and consequences for identity politics in the region. Consideration is given to the ways in which, and the reasons why, identity formation, differentiation, modes of belonging, and experiences of rupture and affirmation have been mediated. By focusing on the Popes Agreement, the collection also offers valuable insight into the processes involved in (re)making boundaries, (re)forming ethnic and national identities, (re)forming citizenship, and (re)forming national histories. Bringing together expert contributors with intimate knowledge of, and long-term engagement with, the region, this volume will be of interest to scholars and students of anthropology, history and East European studies, history, and international relations.

Creditworthy - Josh Lauer 2017-07-25 The first consumer credit bureaus appeared in the 1870s and quickly amassed huge archives of deeply personal information. Today, the three leading credit bureaus are among the most powerful institutions in modern life—yet we know almost nothing about them. Supervisors, Employers, and TransUnion are multi-billion-dollar corporations that track our movements, spending behavior, and financial status. This data is used to predict our likelihood of default and to judge our transmemberhices and value as a broad array of contexts, from insurance and mortgage and employment and housing. In Creditworthy, the first comprehensive history of this crucial American institution, Josh Lauer explores the evolution of credit reporting from its nineteenth-century origins to the rise of the modern consumer data industry. By revealing the sophistication of early credit reporting networks, Creditworthy highlights the leading role that commercial surveillance has played—indefedrial of state surveillance systems—in monitoring the economic lives of Americans. Lauer charts how credit reporting grew from an industry that relied on personal knowledge of consumers to one that employs sophisticated algorithms to determine a person's trustworthiness. Ultimately, Lauer argues that by converting individual reputations into brief written reports—and, later, credit ratings and credit scores—credit bureaus did something more profound: they invented the modern concept of financial identity. Creditworthy reminds us that creditworthiness is no just about economic "facts." It is fundamentally concerned with—and determines—our social standing as an honest, reliable, profit-generating member of society.

Stephen the Great and Balkan Nationalism - Jonathan Eades 2013-10-25 The defeat of the Ottoman Empire in the Balkans in 1453 led the beginning of a historic legacy. The victor became known as Stephen the Great or Moldova Christian, Champion of Christ. Perceived as the founder of a Balkan identity, Stephen the Great maintained Moldova's independence during periods of fierce Ottoman attack between 1457 and 1532. His Christian religious stance meant that, in the eyes of Europe, he had not only defeated a significant territorial threat but had elevated Christianity to a superior level as norms over his Muslim opponents. Here, Jonathan Eades seeks to reveal the mechanism behind his legacy, reviewing the state formations that allowed the national hero to emerge, and explaining the methods that preserve his memory in the region today. By combining the latest historical studies of the anti-Ottoman resistance with new archaeological findings, Stephen the Great and Balkan Nationalism engages with a fresh approach of the history of the Balkans, and renegotiates the story of the Ottoman Empire's impact in Europe. This is an important book for those with an interest in medieval history, Balkan history and the Ottoman.

History and Popular Memory - Paul A. Cohen 2014-04-15 When people experience a traumatic event, such as war or the threat of annihilation, they often turn to history for stories that promise a positive outcome to their suffering. During World War II, the French took comfort in the story of Joan of Arc and her heroic efforts to fend off France of foreign occupation. To bring the Joan narrative more into line with current circumstances, popular renditions modified the original story so that what people believed took place in the past was often quite different from what actually occurred. Paul A. Cohen believes that this interplay between story and history is a worldwide phenomenon found in countries of radically different cultural, religious, and social character. He focuses on Serbia, Israel, the Soviet Union, China, Great Britain, and France, all of which experienced severe crises in the twentieth century and, in response, appropriated age-old historical narratives that resonated with what was happening in the present to serve a comforting, restorative purpose. A central theme in the book is the distinction between popular memory and history. Although vitally important to historians, this distinction is routinely blurred in people's minds, and the historian's truth often cannot compete with the power of a compelling story from the past, even when it has been seriously distorted by myth or political manipulation. Cohen concludes by suggesting that the patterns of interaction he probes, given their near universality, may well be rooted in certain human propensities that transcend cultural difference.
