Harry Stack Sullivan F. Barton Evans III 2006-09-21 Harry Stack Sullivan (1892-1949) has been described as the "most original figure in American psychiatry." Challenging Freud's psychoanalytic theory, Sullivan founded the interpersonal theory of psychiatry, which emphasized the role of interpersonal relations, society and culture as the primary determinants of personality development and psychopathology. This concise and coherent account of Sullivan's work and life strikes the modern audience to rediscover the provocative, groundbreaking ideas embodied in Sullivan's interpersonal theory and psychotherapy.

Interpersonal Relations In Nursing: Hildegarde E. Pepuls, Din 1951-06-29 Originally published in 1952 by a pioneering figure in nursing history, this book addresses the then novel theory of interpersonal relations as it was relevant to the work of nurses. The framework suggested that interactions phenomena that occur during patient-nurse relationships have qualitative impact on patient outcomes. While the past four decades have seen a substantial expansion in the use and understanding of interpersonal theory, such as cognitive development and general systems theory, this classic book remains a seminal foundation for all nurses as much subsequent work used this work as its starting point. Springer Publishing Company is delighted to make this book available again.

P. Mullahy 2012-12-06 An impressive amount of work, experimental, statistical and "observational" or "phenomenological" has been done in psychiatry during the past 30 to 40 years. Although Sullivan's achievements have placed him in the first rank of psychiatry, some of the work done since he died in 1949 can be assimilated to enhance his achievements. For this reason, I enlisted the aid of Menachem Meltzer, M.D., whose wide knowledge of recent and contemporary psychiatric studies is admirably suited to the task of examining some of the themes in Sullivan's theories. PATRICK MULLAHY Acknowledgments The authors wish to acknowledge gratefully Miss. Marc Hughes, former secretary, Department of Psychology, Manhattan College, for typing the original manuscript. Dr. Robert G. Evans of the Washington School of Psychiatry, read the original manuscript and contributed several keen criticisms and suggestions for which we are grateful. We wish to express our thanks to the Department of Psychiatry, at Manhattan North Central Bronx Hospitals for the support in preparing the final manuscript of the book. Robert Steimuller, Director of Psychiatry at North Central Bronx Hospital was generous with his help. We would like as well to acknowledge the support of the Department of Psychiatry at Bronx-Lebanon Hospital Center and its Director of Psychiatry, Dr. Harvey Bluestone.
