A Potencie Of Life Books In Society The Clark Lectures 1986 1987
British Library Studies In The History Of The Book

A Potencie of Life-Nicolas Barker 2001
The wide range of topics covered in this volume relate to manuscripts as well as the printed book. Essays cover papermaking in America, hand bookbinding, authorship and maritime publishing in 18th-century Britain. But it is the process of interdependent exchange between author, publisher and reader that is the central theme to the essays which are based on lectures given at the William Andrews Clark Library.

A Potencie of Life-Nicolas Barker 1993

The Book History Reader-David Finkelstein 2002
The editors illustrate how book history studies have evolved into a broad approach which incorporates social and cultural considerations governing the production, dissemination and reception of print and texts.

Areopagitica-John Milton 1890

Books as History-David Pearson 2012
People usually think of books in terms of their contents, their texts, with less thought for books as artefacts. In fact books may possess all kinds of potentially interesting qualities beyond their texts, as designed or artistic objects, or because they have unique properties deriving from the ways they have been printed, bound, annotated, beautified or defaced. This text explores books from the Middle Ages to the present day to show why books may be interesting beyond their texts. Books can develop their own individual histories, which provide important evidence about the way they were used and regarded in the past, and which make them an indispensable part of the fabric of our cultural heritage. This book will raise awareness of an important aspect of the life of books in the context of the ongoing debate about their future. Extensively illustrated with a wide range of images, this book is not only approachable but also thought-provoking.

Living Books-Janneke Adema 2021-08-31
Reimagining the scholarly book as living and collaborative--not as commodified and essentialized, but in all its dynamic materiality. In this book, Janneke Adema proposes that we reimagine the scholarly book as a living and collaborative project--not as linear, bound, and fixed, but as fluid, remixed, and liquid, a space for experimentation. She presents a series of cutting-edge experiments in arts and humanities book publishing, showcasing the radical new forms that book-based scholarly work might take in the digital age. Adema's proposed alternative futures for the scholarly book go beyond such print-based assumptions as fixity, stability, the single author, originality, and copyright, reaching instead for a dynamic and emergent materiality. Adema suggests ways to unbind the book, describing experiments in scholarly book publishing with new forms of anonymous collaborative authorship, radical open access publishing, and experimental, living, and remixed publications, among other practices. She doesn't cast digital as the solution and print as the problem; the problem in scholarly publishing, she argues, is not print itself, but the way print has been commodified and essentialized. Adema explores alternative, more ethical models of authorship; constructs an alternative genealogy of openness; and examines opportunities for intervention in current cultures of knowledge production. Finally, asking why it is that we cut and bind our research together at all, she examines two book publishing projects that experiment with remix and reuse and try to rethink and reperform the book-apparatus by taking responsibility for the cuts they make.

Latin Books and the Eastern Orthodox Clerical Elite in Kiev, 1632-1780-Ludmilla Charipova 2006-09-19
Founded in 1632, the library of the Kiev Mohyla Academy went up in flames in 1780. Encompassing predominantly humanist, scholastic and homiletic titles in Latin yet placed in a heartland of Eastern Orthodox territories, the library was something of an anomaly for its time, offering East Slavic intellectuals a comprehensive introduction to Western printed matter. Those books brought along with them not only a new pattern of knowledge, but also an awareness of the diversity and multiplicity of views which the educated could hold.

Annual Bibliography of the History of the Printed Book and Libraries-Department of Information & Collections 2006-02-10
The Annual Bibliography of the History of the Printed Book and Libraries aims at recording articles of scholarly value which relate to the history of the printed book, to the history of arts, crafts, techniques and equipment, and of the economic social and cultural environment, involved in its production, distribution, conservation and description.

The Sociocultural Functions of Edwardian Book Inscriptions-Lauren Alex O'Hagan 2021-03-30
This innovative text draws on theories and methodologies from the fields of multimodality, ethnography, and literacy studies to explore the sociocultural significance of book ownership and book inscriptions in Edwardian Britain. The Sociocultural Functions of Edwardian Book Inscriptions examines
evidence gathered from historical records, archival documents, and the inscriptive practices of individuals from the Edwardian era to foreground the social, communicative, and performative functions of inscriptive practices and illustrate how material, lexical, and semiotic means were used to perform identity, contest social status, and forge relationships with others. The text adopts a unique ethnohistorical approach to multimodality, supporting the development of a typology of book inscriptions which will serve as a unique interpretive framework for analysis of literary artifacts in the context of broader sociopolitical forces. This text will benefit doctoral students, researchers, and academics in the fields of literacy studies, English language arts, and research methods in education more broadly. Those interested in British book history, anthropology, and 20th-century literature will also enjoy this volume.

‘Grossly Material Things’—Helen Smith 2012-05-03 Virginia Woolf described fictions as ‘grossly material things’, rooted in their physical and economic contexts. This book takes Woolf’s hint as its starting point, asking who made the books of the English Renaissance. It recovering the ways in which women participated as co-authors, editors, translators, patrons, printers, booksellers, and readers.

Attributing Authorship—Harold Love 2002-06-20 Recent literary scholarship has seen a shift of interest away from questions of attribution. Yet these questions remain urgent and important for any historical study of writing, and have been given a powerful new impetus by advances in statistical studies of language and the coming on line of large databases of texts in machine-searchable form. The present book is the first comprehensive survey of the field from a literary perspective to appear for forty years. It covers both traditional and computer based approaches to attribution, and evaluates each in respect of their potentialities and limitations. It revisits a number of famous controversies, including those concerning the authorship of the Homeric poems, books from the Old and New Testaments, and the plays of Shakespeare. Written with wit as well as erudition Attributing Authorship will make this intriguing field accessible for students and scholars alike.

The Broadview Reader in Book History—Michelle Levy 2014-10-23 Book History has emerged as one of the most exciting new interdisciplinary fields of study in the humanities. By focusing on the production, circulation and reception of the book in all its forms, it has transformed the study of history, literature and culture. The Broadview Book History Reader is the most complete and up-to-date introduction available to this area of study. The reader reprints 33 key essays in the field, grouped conceptually and provided with headnotes, explanatory footnotes, an introduction, a chronology, and a glossary of terms.

Books in Motion in Early Modern Europe—Daniel Bellingradt 2017-09-07 This book presents and explores a challenging new approach in book history. It offers a coherent volume of thirteen chapters in the field of early modern book history covering a wide range of topics and it is written by renowned scholars in the field. The rationale and content of this volume will revitalize the theoretical and methodological debate in book history. The book will be of interest to scholars and students in the field of early modern book history as well as in a range of other disciplines. It offers book historians an innovative methodological approach on the life cycle of books in and outside Europe. It is also highly relevant for social-economic and cultural historians because of the focus on the commercial, legal, spatial, material and social aspects of book culture. Scholars that are interested in the history of science, ideas and news will find several chapters dedicated to the production, circulation and consumption of knowledge and news media.

The Production of Books in England 1350-1500—Alexandra Gillespie 2011-04-14 Between roughly 1350 and 1500, the English vernacular became established as a language of literary, bureaucratic, devotional and controversial writing; metropolitan artisans formed guilds for the production and sale of books for the first time; and Gutenberg's and eventually Caxton's printed books reached their first English consumers. This book gathers the best work on manuscript books in England made during this crucial but neglected period. Its authors survey existing research, gather intensive new evidence and develop new approaches to key topics. The chapters cover the material conditions and economy of the book trade; amateur production both lay and religious; the effects of censorship; and the impact on English book production of manuscripts and artisans from elsewhere in the British Isles and Europe. A wide-ranging and innovative series of essays, this volume is a major contribution to the history of the book in medieval England.

Women and the Circulation of Texts in Renaissance Italy—Brian Richardson 2020-03-31 The first comprehensive guide to women's promotion and use of textual culture, in manuscript and print, in Renaissance Italy.

How to Do Things with Books in Victorian Britain—Leah Price 2013-10-27 How to Do Things with Books in Victorian Britain asks how our culture came to frown on using books for any purpose other than reading. When did the coffee-table book become an object of scorn? Why did law courts forbid witnesses to kiss the Bible? What made Victorian cartoonists mock commuters who hid behind the newspaper, ladies who matched their books' binding to their dress, and servants who reduced newspapers to fish 'n' chips wrap? Shedding new light on novels by Thackeray, Dickens, the Brontës, Trollope, and Collins, as well as the urban sociology of Henry Mayhew, Leah Price also uncovers the lives and afterlives of anonymous religious tracts and household manuals. From knickknacks to wastepaper, books mattered to the Victorians in ways that cannot be explained by their printed content alone. And whether displayed, defaced, exchanged, or discarded, printed matter participated, and still participates, in a range of transactions that stretches far beyond reading.
Supplementing close readings with a sensitive reconstruction of how Victorians thought and felt about books, Price offers a new model for integrating literary theory with cultural history. How to Do Things with Books in Victorian Britain reshapes our understanding of the interplay between words and objects in the nineteenth century and beyond.

**Romantic Shades and Shadows**-Susan J. Wolfson 2018-06-15 Romantic Shades and Shadows is written with a lucidity, wit, and accessibility that will appeal to general readers, and with a critical sophistication and scholarly expertise that will engage advanced students, critics, and professional peers.

**The History of the Book in the West: 1700-1800**-Eleanor F. Shevlin 2017-03-02 Influenced by Enlightenment principles and commercial transformations, the history of the book in the eighteenth century witnessed not only the final decades of the hand-press era but also developments and practices that pointed to its future: ‘the foundations of modern copyright; a rapid growth in the publication, circulation, and reading of periodicals; the promotion of niche marketing; alterations to distribution networks; and the emergence of the publisher as a central figure in the book trade, to name a few.’ The pace and extent of these changes varied greatly within the different sociopolitical contexts across the western world. The volume’s twenty-four articles, many of which proffer broader theoretical implications beyond their specific focus, highlight the era’s range of developments. Complementing these articles, the introductory essay provides an overview of the eighteenth-century book and milestones in its history during this period while simultaneously identifying potential directions for new scholarship.

**The British Book Trade and Spanish American Independence**-Eugenia Roldán Vera 2017-03-02 The British Book Trade and Spanish American Independence is a pioneering study of the export of books from Britain to early-independent Spanish America, which considers all phases of production, distribution, reading, and re-writing of British books in the region, and explores the role that these works played in the formation of national identities in the new countries. Analysing in particular the publishing house of Rudolph Ackermann, which dominated the export of British books to Spanish in the former colonies in the 1820s, it discusses the ways in which the printed form of these publications affected the knowledge conveyed by them. After a survey of the peculiar characteristics of print culture in early-independent Spanish America and the trends in the import of European books in the region, the author examines the operation of Ackermann’s publishing enterprise. She shows how the collaborative nature of this enterprise, involving a number of Spanish American diplomats as sponsors and Spanish exiles as writers and translators, shaped the characteristics of its publications, and how the notion of ‘useful knowledge’ conveyed by them was deployed in the service of both commercial and educational concerns. The hitherto unexplored mechanisms of book import, distribution, wholesale and retailing in Spanish America in the 1820s are also analysed as is the way in which the significance of the knowledge transmitted by those books shifted in the course of their production and distribution. The author examines how the question-and-answer form of Ackermann’s textbooks constrained both publishers and writers and oriented their readers’ relation with the texts. She then looks at the various ways in which foreign knowledge was appropriated in the construction of individual, social, national, and continental identities; this is done through the study of a number of individual reading experiences and through the analysis of the editions and adaptations of Ackermann’s textbooks during the nineteenth century.

**Didactic Literature in England 1500–1800**-Sara Pennell 2017-03-02 Ranging from music to astronomy, gardening to the Bible, this essay collection is the first multi-disciplinary volume to examine a kind of text that was a staple of early modern English publishing: the how-to book. It tackles a wide range of subjects - grammars, music books, gardening manuals, teach-yourself book-keeping - while highlighting the commonalities of diverse texts as didactic works, and situating this material in wider intellectual and material contexts. An introductory essay explores the uses of didactic texts in early modern culture, evaluates their relationships with other literary forms, and establishes the significance of such texts within the cultural history of the period. There follow contributions by an international group of scholars from a broad range of disciplines, including the history of science, literature, linguistics, and musicology. The volume addresses the important issue of how texts that tend to be regarded today as ‘non-literary’ functioned within early modern literature. It also evaluates relationships between textual prescription and actual practices, and the early modern conception of experience as opposed to knowledge, that presently concern social and cultural historians and historians of science. Drawing attention to non-fictional, didactic texts as opposed to the imaginative and political writings that have been its focus until now, Didactic Literature in England 1500–1800 adds a new dimension to the study of reading, readership and publishing. All in all, it constitutes a substantial contribution to histories of knowledge, of educational processes and practices, and to the history of the book in early modern England.

**Romanticism, Self-Canonization, and the Business of Poetry**-Michael Gamer 2017-02-17 This is the first book to examine how Romantic writers transformed poetic collections to reach new audiences. In a series of case studies, Michael Gamer shows Romantic poets to be fundamentally social authors: working closely with booksellers, intimately involved in literary production, and resolutely concerned with current readers even as they presented themselves as disinterested artists writing for posterity. Exploding the myth of Romantic poets as naïve, unworldly, or unconcerned with the practical aspects of literary production, this study shows them instead to be engaged with intellectual property, profit and loss, and the power of reprinting to reshape literary reputation. Gamer offers a fresh perspective on how we think about poetic revision, placing it between aesthetic and economic registers and foregrounding the centrality of poetic collections rather than individual poems to the construction of literary careers.

**Re-Constructing the Book**-Maureen Bell 2019-01-31 This title was first published in 2001. Literary critics, textual editors and...
bibliographers, and historians of publishing have hitherto tended to publish their research as if in separate fields of enquiry. The purpose of this volume is to bring together contributions from these fields in a dialogue rooted in the transmission of texts. Arranged chronologically, so as to allow the use of individual sections relevant to period literature courses, the book offers students and teachers a set of essays designed to reflect this use of essays and to signal their potential for fruitful integration. Some of the essays answer the demand “Show me what literary critics (or textual editor; or book historians) do and how they do it”, and stand as examples of the different concerns, methodologies and strategies employed. Others draw attention to the potential of the approaches in combination.

The Trans-Saharan Book Trade - 2010-12-07 Concerned with the history of scholarly production, book markets and trans-Saharan exchanges in Muslim Africa (primarily western and northern Africa), as well as the creation of manuscript libraries, this book consists of a collection of twelve essays that examine these issues from an interdisciplinary perspective.

Marketing Literature - C. Squires 2007-10-11 This is an important study of the publishing of contemporary writing in Britain. It analyzes the changing social, economic and cultural environment of the publishing industry in the 1990s-2000s, and investigates its impact on genre, authorship and reading. It includes case studies of Trainspotting and the His Dark Materials trilogy.

Beauty and the Book - Megan Benton 2000-01-01 After World War I, the US was flooded with newspapers, magazines, radio stations and movies. Many feared serious books would disappear altogether. The concern caused a boom in fine editions, valued for beauty, craftsmanship or rarity, rather than content, and this is their story.

A Bibliographic History of the Book - Joseph Rosenblum 1995 "...skillfully compiled...should be useful to anyone interested in placing his or her studies in the context of printed and bound literature...” — ENGLISH LITERATURE IN TRANSITION 1880-1920

The Library Book - Susan Orlean 2019-10-01 Susan Orlean’s bestseller and New York Times Notable Book is “a sheer delight...as rich in insight and as varied as the treasures contained on the shelves in any local library” (USA TODAY)—a dazzling love letter to a beloved institution and an investigation into one of its greatest mysteries. “Everybody who loves books should check out The Library Book” (The Washington Post). On the morning of April 28, 1986, a fire alarm sounded in the Los Angeles Public Library. The fire was disastrous: it reached two thousand degrees and burned for more than seven hours. By the time it was extinguished, it had consumed four hundred thousand books and damaged seven hundred thousand more. Investigators descended on the scene, but more than thirty years later, the mystery remains: Did someone purposefully set fire to the library—and if so, who? Weaving her lifelong love of books and reading into an investigation of the fire, award-winning New Yorker reporter and New York Times bestselling author Susan Orlean delivers a “delightful...reflection on the past, present, and future of libraries in America” (New York magazine) that manages to tell the broader story of libraries and librarians in a way that has never been done before. In the “exquisitely written, consistently entertaining” (The New York Times) The Library Book, Orlean chronicles the LAPL fire and its aftermath to showcase the larger, crucial role that libraries play in our lives; delves into the evolution of libraries; brings each department of the library to vivid life; studies arson and attempts to burn a copy of a book herself; and reexamines the case of Harry Peak, the blond-haired actor long suspected of setting fire to the LAPL more than thirty years ago. “A book lover’s dream...an ambitiously researched, elegantly written book that serves as a portal into a place of history, drama, culture, and stories” (Star Tribune, Minneapolis), Susan Orlean’s thrilling journey through the stacks reveals how these beloved institutions provide much more than just books—and why they remain an essential part of the heart, mind, and soul of our country.

When Novels Were Books - Jordan Alexander Stein 2020 The novel was born religious, alongside Protestant texts produced in the same format by the same publishers. Novels borrowed features of these texts but over the years distinguished themselves, becoming the genre we know today. Jordan Alexander Stein traces this history, showing how the physical object of the book shaped the stories it contained.

A Social History of the Chinese Book - Joseph P. McDermott 2006-04-01 In this learned, yet readable, book, Joseph McDermott introduces the history of the book in China in the late imperial period from 1000 to 1800. He assumes little knowledge of Chinese history or culture and compares the Chinese experience with books with that of other civilizations, particularly the European. Yet he deals with a wide range of issues in the history of the book in China and presents novel analyses of the changes in Chinese woodblock bookmaking over these centuries. He presents a new view of when the printed book replaced the manuscript and what drove that substitution. He explores the distribution and marketing structure of books, and writes fascinatingly on the history of book collecting and about access to private and government book collections. In drawing on a great deal of Chinese, Japanese, and Western research this book provides a broad account of the way Chinese books were printed, distributed, and consumed by literati and scholars, mainly in the lower Yangzi delta, the cultural center of China during these centuries. It introduces interesting personalities, ranging from wily book collectors to an indigent shoe-repairman collector. And, it discusses the obstacles to the formation of a truly national printed culture for both the well-educated and the struggling reader in recent times. This broad and comprehensive account of the development of printed Chinese culture from 1000 to 1800 is written for anyone interested in the history of the book. It also offers important new insights into book culture and its place in society for the student of Chinese history and culture. ‘A brilliant piece of synthetic research as well as a delightful read, it offers a history of the Chinese book to the eighteenth century that is without equal.’ - Timothy Brook, University of British Columbia Writers, scribes, engravers, printers, binders, publishers, distributors, dealers, literati, scholars, librarians, collectors, voracious readers — the full gamut of a vibrant book culture in China over one thousand years — are examined with eloquence and perception by Joseph McDermott in The Social History of the Book. His lively exploration will be of consuming interest to bibliophiles of every persuasion.' - Nicholas A. Basbanes, author of A Gentle Madness, Patience and Fortitude, A Splendor of Letters, and Every Book Its
The Broadview Introduction to Book History—Michelle Levy 2017-04-30 Book history has emerged in the last twenty years as one of the most important new fields of interdisciplinary study. It has produced new interpretations of major historical events, has made possible new approaches to history, literature, media, and culture, and presents a distinctive historical perspective on current debates about the future of the book. The Broadview Introduction to Book History provides the most comprehensive and up-to-date introduction to this field. Written in a lively, accessible style, chapters on materiality, textuality, printing and reading, intermediarity, and remediation guide readers through numerous key concepts, illustrated with examples from literary texts and historical documents produced across a wide historical range. An ideal text for undergraduate and graduate courses in book history, it offers a road map to this dynamic interdisciplinary field.

Annual Bibliography of the History of the Printed Book and Libraries—Dept. of Special Collections of the Koninklijke Bibliotheek 1999-08-31 This twenty-seventh volume of ABHB (Annual bibliography of the history of the printed book and libraries) contains 5076 records, selected from some 1000 periodicals, the list of which follows this introduction. They have been compiled by the National Committees of the following countries: Arab Countries Italy Australia Latin America Austria Latvia Lithuania Belarus Belgium Luxembourg Bulgaria Mexico The Netherlands Canada Croatia Poland Estonia Portugal Finland Rumania France Russia Germany South Africa Great Britain Spain Hungary Sweden Switzerland Iceland Ukraine Ireland Israel USA Benevolent readers are requested to signal the names of bibliographers and historians from countries not mentioned above, who would be willing to co-operate to this scheme of international bibliographic collaboration. The editor will greatly appreciate any communication on this matter. Subject As has been said in the introduction to the previous volumes, this bibliography aims at recording all books and articles of scholarly value which relate to the history of the printed book, to the history of the arts, crafts, techniques and equipment, and of the economic, social and cultural environment, involved in its production, distribution, conservation, and description. Of course, the ideal of a complete coverage is nearly impossible to attain. However, it is the policy of this publication to include missing items as VIII introduction much as possible in the forthcoming volumes. The same applies to countries newly added to the bibliography.

The Enlightenment and the Book—Richard B. Sher 2008-09-15 The late eighteenth century witnessed an explosion of intellectual activity in Scotland by such luminaries as David Hume, Adam Smith, Hugh Blair, William Robertson, Adam Ferguson, James Boswell, and Robert Burns. And the books written by these seminal thinkers made a significant mark during their time in almost every field of polite literature and higher learning throughout Britain, Europe, and the Americas. In this magisterial history, Richard B. Sher breaks new ground for our understanding of the Enlightenment and the forgotten role of publishing during that period. The Enlightenment and the Book seeks to remedy the common misperception that such classics as The Wealth of Nations and The Life of Samuel Johnson were written by authors who eyed their publishers as minor functionaries in their profession. To the contrary, Sher shows how the process of bookmaking during the late eighteenth-century involved a deeply complex partnership between authors and their publishers, one in which writers saw the book industry not only as pivotal in the dissemination of their ideas, but also as crucial to their dreams of fame and monetary gain. Similarly, Sher demonstrates that publishers were involved in the project of bookmaking in order to advance human knowledge as well as to accumulate profits. The Enlightenment and the Book explores this tension between creativity and commerce that still exists in scholarly publishing today. Lavishly illustrated and elegantly conceived, it will be must reading for anyone interested in the history of the book or the production and diffusion of Enlightenment thought.

Reading Books and Prints as Cultural Objects—Evangelia Stead 2017-12-20 This book contributes significantly to book, image and media studies from an interdisciplinary, comparative point of view. Its broad perspective spans medieval manuscripts to e-readers. Inventive methodology offers numerous insights into visual, manuscript and print culture: material objects relate to meaning and reading processes; images and texts are examined in varied associations; the symbolic, representational and cultural agency of books and prints is brought forward. An introduction substantiates methods and approaches, ten chapters follow along media lines: from manuscripts to prints, printed books, and e-readers. Eleven contributors from six countries challenge the idea of a unified field, revealing the role of books and prints in transformation and circulation between varying cultural trends, ‘high’ and ‘low’. Mostly Europe-based, the collection offers book and print professionals, academics and graduates, models for future research, imaginatively combining material culture with archival data, cultural and reading theories with historical patterns.

Books and Readers in Early Modern England—Jennifer Andersen 2012-07-28 Books and Readers in Early Modern England examines readers, reading, and publication practices from the Renaissance to the Restoration. The essays draw on an array of documentary evidence—from library catalogs, prefaces, title pages and dedications, marginalia, commonplace books, and letters to ink, paper, and bindings—to explore individual reading habits and experiences in a period of religious dissent, political instability, and cultural transformation. Chapters in the volume cover oral, scribal, and print cultures, examining the emergence of the “public spheres” of reading practices. Contributors, who include Christopher Grose, Ann Hughes, David Scott Kastan, Kathleen Lynch, William Sherman, and Peter Stallybrass, investigate interactions among publishers, texts, authors, and audience. They discuss the continuity of the written word and habits of mind in the world of print, the formation and differentiation of readerships, and the increasing influence of public opinion. The work demonstrates that early modern publications appeared in a wide variety of forms—from periodical literature to polemical pamphlets—and reflected the radical transformations occurring at the time in the dissemination of knowledge through the written word. These forms were far more ephemeral, and far more widely available, than modern stereotypes of writing from this period suggest.
Old Books and New Histories - Leslie Howsam 2006-09-16 Studies in the culture and history of the book are a burgeoning academic specialty. Intriguing, rigorous, and vital, they are nevertheless rooted within three major academic disciplines - history, literary studies, and bibliography - that focus respectively upon the book as a cultural transaction, a literary text, and a material artefact. Old Books and New Histories serves as a guide to this rich but sometimes confusing territory, explaining how different scholarly approaches to what may appear to be the same entity can lead to divergent questions and contradictory answers. Rather than introduce the events and turning points in the history of book culture, or debates among its theorists, Leslie Howsam uses an array of books and articles to offer an orientation to the field in terms of disciplinary boundaries and interdisciplinary tensions. Howsam's analysis maps studies of book and print culture onto the disciplinary structure of the North American and European academic world. Old Books and New Histories is also an engaged statement of the historical perspective of the book. In the final analysis, the lesson of studies in book and print culture is that texts change, books are mutable, and readers ultimately make of books what they need.

Intralingual Translation of British Novels - Linda Pillière 2021-04-22 Building on an upsurge of interest in the Americanisation of British novels triggered by the Harry Potter series, this book explores the various ways that British novels, from children's fiction to travelogues and Book Prize winners, have been adapted and rewritten for the US market. Drawing on a vast corpus of over 80 works and integrating the latest research in multimodality and stylistics, Linda Pillière analyses the modifications introduced to make British English texts more culturally acceptable and accessible to the American English reader. From paratextual differences in cover, illustrations, typeface and footnotes to dialectal changes to lexis, tense, syntax and punctuation, Pillière explores the sociocultural and ideological pressures involved in intralingual translation and shows how the stylistic effects of such changes - including loss of meaning, voice, rhythm and word play - often result in a more muted American edition. In doing so, she reveals how homing in on numerous small adjustments can provide fascinating insights into the American publishing process and readership.

An Introduction to Book History - David Finkelstein 2012-10-24 This second edition of An Introduction to Book History provides a comprehensive critical introduction to the development of the book and print culture. Each fully revised and updated chapter contains new material and covers recent developments in the field, including: The Postcolonial Book Censorship by states and religions Social History, and the recognition of underrepresentation of its value to book history studies Contemporary publishing Each section begins with a summary of the chapter's aims and contents, followed by a detailed discussion of the relevant issues, concluding with a summary of the chapter and points to ponder. Sections include: the history of the book orality to Literacy literacy to printing authors, authorship and authority printers, booksellers, publishers, agents readers and reading the future of the book. An Introduction to Book History is an ideal introduction to this exciting field of study, and is designed as a companion text to The Book History Reader.
