A Compendious Syriac Dictionary-Robert Payne Smith 1998 This standard lexicon of Syriac has long been the choice of students of Syriac, both for its comprehensiveness and also because of its handy size. It originated as an abridgement of Payne Smith's Thesaurus Syriacus, a substantially larger work that also tends to be less accessible for the student. Here the meanings of the Syriac words are given in English, and the order of the Syriac is alphabetical, to avoid requiring the student to know the root of the word being looked up. An essential tool for anyone studying or researching Syriac texts or literature and for students of the Semitic languages. The Compendious Syriac Dictionary was first published by Oxford University Press in 1903 and has been out of print for a number of years. A quality Eisenbrauns reprint based on the 1976 printing.

A Compendious Syriac Dictionary-Robert Payne Smith 2017-02-03 Excerpt from A Compendious Syriac Dictionary: Founded Upon the Thesaurus Syriacus of R. Payne Smith, D.D It is a pleasure to offer grateful acknowledgement to various kind helpers; to my valued old friend, Dr. Neubauer, for encouragement from the beginning; to M. Rubens Duval and to Dean Maclean for their extreme patience and kindness in reading all the proofs. Those of the first part were also revised by my father, and most of the latter portions by my husband. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. A Compendious Syriac Dictionary-Jessie Payne Smith 1999-02-23 In this major reference tool, Jessie Payne Smith has abridged the great two-volume work, 'Thesaurus Syriacus,' by her late father. But her task was not to simply edit down the earlier, massive tomes. She also provided English translations for each entry and additional notations. Her father's dictionary had translated each Syriac word into Latin. The Latin translations made it more internationally accessible; but with the decline of the use of Latin, it decreased in usefulness. Her labors have insured that it continues to benefit scholars and students of Syriac.

Corpus Linguistics and Textual History - Percy van Keulen 2006-01-01 Over the years the
use of computers for research has become increasingly important in Biblical Studies. However, a combination of computational linguistics with diachronic text-critical and text-historical approaches has hardly ever taken place. Quite often, there is mutual misunderstanding between computational linguistics and more traditional approaches in the field of linguistics and textual analysis. For example, in computer-assisted research of modern text corpora it is common to treat the text as an unequivocal and unidimensional sequence of characters. In Biblical Studies, however, either text is considered an abstraction, the result of a scholarly reconstruction based on the extant textual witnesses. Here a fundamental difference in approach reveals itself. The present volume tries to overcome the misunderstanding between the various disciplines and to establish how a fruitful interaction of information technology, linguistics and textual criticism, can contribute to the analysis of ancient texts. It addresses questions concerning the confrontation between synchronic and diachronic approaches, the role of linguistic analysis in the interpretation of texts, and the interaction of linguistic theory and the analysis of linguistic data. The first section of this volume contains the papers presented at the CALAP seminar 2003. In the second section different aspects of the interdisciplinary analysis are applied to a selected passage from the Peshitta of Kings.

**Language and Interpretation in the Syriac Text of Ben Sira**-W. Th Van Peursen 2007
After subjecting the Syriac translation of Ben Sira to traditional philological analysis the author conducts computer-assisted linguistic studies of phrases, clauses and texts. He reaches particularly interesting proposals for a corpus-based description of phrase structure based on a so-called maximum matrix.

**New Idioms Within Old**-Eric D. Reymond 2011
This volume explores the language and poetic structure of the seven non-Masoretic poems preserved in the Dead Sea Scroll labeled 11Q5 or 11QPs. It presents fresh readings of the Hebrew poems, which were last studied intensively almost fifty years ago, stressing their structural and conceptual coherence and incorporating insights gained from the scholarship of recent decades. Each chapter addresses a single poem and describes its poetic structure, including its use of parallelism and allusion to scripture, as well as specific problems related to the poem's interpretation. In addition, the book considers these poems in relation to what they reveal about the development of Hebrew poetry in the late Second Temple period.

Desideratum in the field of the New Testament textual criticism. Based upon manuscript Chaldean 25 from the depository of the Chaldean Antonian Order of St. Hormizd (O.A.O.C.), this edition describes and collates the surviving Harklean manuscripts from the first millennium. The first critical apparatus reports variants to the lemma while a second apparatus reports variants in the marginal readings. Colour images from the manuscripts are included so that the reader can fully appreciate the Harklean tradition and understand how the apparatuses were created. The introduction explains the system of text division, the marginalia, the diacritics and the other punctuation marks in the Harklean traditions. Special attention is given to the meaning of the critical signs that Thomas of Harqel employed in his creation of a new Syriac translation of the New Testament.

An Introductory Bibliography for the Study of Scripture-Joseph A. Fitzmyer 1990 This third edition of the Introductory Bibliography for the Study of Scripture builds on the two preceding editions. Older, obsolete titles have been eliminated, and newer relevant entries substituted, the twenty-four chapters of the book remain the same, but the contents of them have often changed. The book has been internationalized wherever possible and British publishers have been added to entries, when they could be ascertain. The aim of this revision remains what it has always been: to present a list of titles of reasonable length with which the student who is beginning the study of theology or of Scripture in a serious way might do well to familiarize himself or herself.

The Oxford Handbook of Early Christian Studies - Susan Ashbrook Harvey 2008-09-04
The Oxford Handbook of Early Christian Studies responds to and celebrates the explosion of research in this inter-disciplinary field over recent decades. It is thematically arranged to encompass history, literature, thought, practices, and material culture. Whilst the burgeoning of scholarly work has made it impossible for any one scholar to maintain expertise in every aspect of the discipline, this handbook seeks to aid both the new researcher in the field and the scholar entering an unfamiliar sub-specialty. Each chapter orients readers to the current 'state of the question' in a given area, reflecting on key research issues to date, highlighting primary sources and giving suggestions as to the likely direction of future work. The Handbook takes the period 100 to 600 CE as a chronological span and examines the vast geographical area impacted by the early church, in Western and Eastern late antiquity.

Studies in the Grammar and Lexicon of Neo-Aramaic - Geoffrey Khan 2021-01-15
The Neo-Aramaic dialects are modern vernacular forms of Aramaic, which has a documented history in the Middle East of over 3,000 years. Due to upheavals in the Middle East over the last one hundred years, thousands of speakers of Neo-Aramaic dialects have been forced to migrate from their homes or have perished in massacres. As a result, the dialects are now highly endangered. The dialects exhibit a remarkable diversity of structures. Moreover, the considerable depth of attestation of Aramaic from earlier periods provides evidence for pathways of change. For these reasons the research of Neo-Aramaic is of importance for more general fields of linguistics, in particular language typology and historical linguistics. The papers in this volume represent the full range of research that is currently being carried out on Neo-Aramaic dialects. They advance the field in numerous ways. In order to allow linguists who are not specialists in Neo-Aramaic to benefit from the papers, the examples are fully glossed.
