A Man For All Seasons-Robert Bolt 2013-12-04 A Man for All Seasons dramatises the conflict between King Henry VIII and Sir Thomas More. It depicts the confrontation between church and state, theology and politics, absolute power and individual freedom. Throughout the play Sir Thomas More's eloquence and endurance, his purity, saintliness and tenacity in the face of ever-growing threats to his beliefs and family, earn him status as one of modern drama's greatest tragic heroes. The play was first staged in 1960 at the Globe Theatre in London and was voted New York's Best Foreign Play in 1962. In 1966 it was made into an Academy Award-winning film by Fred Zinneman starring Paul Scofield."A Man for All Seasons is a stark play, sparse in its narrative, sinewy in its writing, which confirms Mr Bolt as a genuine and solid playwright, a force in our awakening theatre." The Sound of a Voice-David Henry Hwang 1984 THE STORY: The scene is an isolated house in the woods where a beautiful young woman lives alone. When a young samurai appears she offers him food and shelter, and when he decides to stay on they eventually become lovers. But while fascinated by his benefactress, the samurai cannot shake a superstitious mistrust of her; for all her delicacy and beauty she is also able to perform wonders of cookery, horticulture and even the martial arts (much to his wounded pride). In the

end it develops that the woman is suspected of being a witch and the samurai has come to seek glory by killing her. This he ultimately cannot, or will not, do, but neither can he accept her superiority, and so he leaves a fateful decision which, as it turns out, is made at a terrible cost to both of them.

The Merchant of Venice-William Shakespeare 2003-05-01 The Merchant of Venice has been performed more often than any other comedy by Shakespeare. Molly Mahood pays special attention to the expectations of the play's first audience, and to our modern experience of seeing and hearing the play. In a substantial new addition to the Introduction, Charles Edelman focuses on the play's sexual politics and recent scholarship devoted to the position of Jews in Shakespeare's time. He surveys the international scope and diversity of theatrical interpretations of The Merchant in the 1980s and 1990s and their different ways of tackling the troubling figure of Shylock.

Wit-Margaret Edson 2014-05-20 Winner of the 1999 Pulitzer Prize for Drama, the New York Drama Critics Circle Award, the Drama Desk Award, the Outer Critics Circle Award, the Lucille Lortel Award, and the Oppenheimer Award Margaret Edson's powerfully imagined Pulitzer Prize-winning play examines what makes life worth living through her exploration of one of existence's unifying experiences—mortality—while she also probes the vital importance of human relationships. What we as her audience take away from this remarkable drama is a keener sense that, while death is real and unavoidable, our lives are ours to cherish or throw away—a lesson that can be both uplifting and redemptive. As the playwright herself puts it, "The play is not about doctors or even about cancer. It's about kindness, but it shows arrogance. It's about compassion, but it shows insensitivity." In Wit, Edson delves into timeless questions with no final answers: How should we live our lives knowing that we will die? Is the way we live our lives and interact with others more important than what we achieve materially, professionally, or intellectually? How does language figure into our lives? Can science and art help us conquer death, or our fear of it? What will seem most important to each of us about life as that life comes to an end? The immediacy of the presentation, and the clarity and elegance of Edson's writing, make this sophisticated, multilayered play accessible to almost any interested reader. As the play begins, Vivian Bearing, a renowned professor of English who has spent years studying and teaching the intricate, difficult Holy Sonnets of the seventeenth-century poet John Donne, is diagnosed with advanced ovarian cancer. Confident of her ability to stay in control of events, she brings to her illness the same intensely rational and painstakingly methodical approach that has guided her stellar academic career. But as her disease and its excruciatingly painful treatment inexorably progress, she begins to question the single-minded values and standards that have always directed her, finally coming to understand the aspects of life that make it truly worth living.

Fences-August Wilson 2019-08-06 From legendary playwright August Wilson comes the powerful, stunning dramatic bestseller that won him critical acclaim, including the Tony Award for Best Play and the Pulitzer Prize. Troy Maxson is a strong man, a hard man. He has had to be to survive. Troy Maxson has gone through life in an America where to be proud and black is to face pressures that could crush a

man, body and soul. But the 1950s are yielding to the new spirit of liberation in the 1960s, a spirit that is changing the world Troy Maxson has learned to deal with the only way he can, a spirit that is making him a stranger, angry and afraid, in a world he never knew and to a wife and son he understands less and less. This is a modern classic, a book that deals with the impossibly difficult themes of race in America, set during the Civil Rights Movement of the 1950s and 60s. Now an Academy Award-winning film directed by and starring Denzel Washington, along with Academy Award and Golden Globe winner Viola Davis.

This Penguin Classics Graphic Deluxe Edition features an array of special features to supplement the novel, including a foreword by Lois Lowry, an introduction by Stephen King, an essay by E. M. Brecht: Mother Courage and Her Children-Peter Thomson 1997-12-11 This is the first comprehensive study of Brecht's Mother Courage. Peter Thomson locates the sources of the play in Brecht's own experience and heritage, and provides a detailed account of Brecht's own production with the newly formed Berliner Ensemble in 1949. Thomson then explores how the play has been transmitted in the English-speaking theatre from Joan Littlewood's production with the Theatre Workshop Company in 1956 to the Royal National Theatre, with Diana Rigg as Mother Courage, in 1995. The book also examines such influential interpretations as those by William Gaskill, Judi Dench, and Glenda Jackson in the English theatre, and by Herbert Balu and Richard Schechner in America. Seminal productions in France and the Germanies are also discussed. A final chapter highlights the new urgency of the text in light of the wars in the former Yugoslavia, and closes with an account of a triumphant staging in Uganda.

One cold, clear Friday night in the middle of winter, while the northern lights hover in the sky above, *Almost's* residents find themselves falling in and out of love in the strangest ways. A Wrinkle in Time-Madeleine L'Engle 2019-07-18 *A Wrinkle in Time* is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Auditory Scene Analysis-Albert S. Bregman 1994-09-29 *Auditory Scene Analysis* addresses the problem of hearing complex auditory environments, using a series of creative analogies to describe the process required of the human auditory system as it analyzes mixtures of sounds to recover descriptions of individual sounds. In a unified and comprehensive way, Bregman establishes a theoretical framework that integrates his findings with an unusually wide range of previous research in psychoacoustics, speech perception, music theory and composition, and computer modeling.

White Teeth-Zadie Smith 2003-05-20 NATIONAL BESTSELLER • Set against London's racial and cultural tapestry, venturing across the former empire and into the past as it barrels toward the future, *White Teeth* revels in the ecstatic hodgepodge of modern life, flirting with disaster, confounding expectations, and embracing the comedy of daily existence. Zadie Smith's dazzling debut caught critics grasping for comparisons and deciding on everyone from Charles Dickens to Salman Rushdie to John Irving and Martin Amis. But the truth is that Zadie Smith's voice is remarkably, fluently, and altogether wonderfully her own. At the center of this invigorating novel are two unlikely friends, Archie Jones and Samad Iqbal. Hapless veterans of World War II, Archie and Samad and their families become

agents of England's irrevocable transformation. A second marriage to Clara Bowden, a beautiful, albeit tooth-challenged, Jamaican half his age, quite literally gives Archie a second lease on life, and produces Irie, a knowing child whose personality doesn't quite match her name (Jamaican for "no problem"). Samad's late-in-life arranged marriage (he had to wait for his bride to be born), produces twin sons whose separate paths confound Iqbal's every effort to direct them, and a renewed, if selective, submission to his Islamic faith.

Multimodal Approaches to Chinese-English Translation and Interpreting-Meifang Zhang 2020-12-30 Nowadays, discourse analysis deals with not only texts but also paratexts and images, so do translation and interpreting studies. Therefore, the concept of

"multimodality" has become an increasingly important topic in subject areas of linguistics, discourse analysis and translation studies. However, up to now, not much research has been done systematically on multimodal factors in translation and interpreting, even less in exploring research models or methodologies for multimodal analysis in translation and interpreting. This book aims to introduce and apply different theories of the multimodal discourse analysis to the study of translations, with case studies on Chinese classics such as the Monkey King, Mulan and The Art of War, as well as on interpretations of up-to-date issues including the Chinese Belt and Road Initiative and Macao tourism. The chapters reflect the first attempts to apply multimodal approaches to translation and interpreting with a special focus on Chinese-English translations and interpreting. They provide new understandings of transformations in the multimodal translation process and useful reference models for researchers who are interested in doing research of similar kind, especially for those who are interested in looking into translations related to Chinese language, literature and culture.

Shakespeare and the Versification of English Drama, 1561-1642-Marina Tarlinskaja 2016-12-05 Surveying the development and varieties of blank verse in the English playhouses, this book is a natural history of iambic pentameter in English. The main aim of the book is to analyze the evolution of Renaissance dramatic poetry. Shakespeare is the central figure of the research, but his predecessors, contemporaries and followers are also important: Shakespeare, the author argues, can be fully understood and appreciated only against the background of the whole period. Tarlinskaja surveys English plays by Elizabethan, Jacobean and Caroline playwrights, from Norton and Sackville's *Gorboduc* to Sirley's *The Cardinal*. Her analysis takes in such topics as what poets treated as a syllable in the 16th-17th century metrical verse, the particulars of stressing in iambic pentameter texts, word boundary and syntactic segmentation of verse lines, their morphological and syntactic composition, syllabic, accentual and syntactic features of line endings, and the way Elizabethan poets learned to use verse form to enhance meaning. She uses statistics to explore the attribution of questionable Elizabethan and Jacobean plays, and to examine several still-enigmatic texts and collaborations. Among these are the poem *A Lover's Complaint*, the anonymous tragedy *Arden of Faversham*, the challenging *Sir Thomas More*, the later Jacobean comedy *The Spanish Gypsy*, as well as a number of Shakespeare's co-authored plays. Her analysis of versification offers new ways to think about the dating of plays, attribution of anonymous texts, and how collaborators divided their task in co-authored dramas.

Frankenstein (with Audio & Text)-Mary Shelley 2021-06-28 *Frankenstein; or, The Modern Prometheus* is a novel written by the British author Mary Shelley. The first edition was published anonymously in London in 1818, and Shelley's name appeared on the revised third edition, published in 1831. The title of the novel refers to the scientist, Victor Frankenstein, who learns how to create life and creates a being in the likeness of man, but larger than average and more powerful. In modern popular culture, people have tended to refer to the Creature as "Frankenstein" (especially in films since 1931), despite this being the name of the scientist, and the creature being unnamed in the book itself. *Frankenstein* is a novel infused with elements of the Gothic novel and the Romantic movement. It was also a warning against the "over-reaching" of modern man and the Industrial Revolution, alluded to in the novel's subtitle, *The Modern Prometheus*. The story has had an influence across literature and popular culture and spawned a complete genre of horror stories and films. It is arguably considered the first fully-realised science fiction novel and raises many issues still relevant to today's society.

Death of a Salesman-Arthur Miller 1998-05-01 The Pulitzer Prize-winning tragedy of a salesman's deferred American dream A Penguin Classic Since it was first performed in 1949, Arthur Miller's Pulitzer Prize-winning drama about the tragic shortcomings of an American dreamer has been recognized as a milestone of the theater. 3D Imaging in Medicine, Second Edition-Jayaram K. Udupa 1999-09-28 The ability to visualize, non-invasively, human internal organs in their true form and shape has intrigued mankind for centuries. While the recent inventions of medical imaging modalities such as computerized tomography and magnetic resonance imaging have revolutionized radiology, the development of three-dimensional (3D) imaging has brought us closer to the age-old quest of non-invasive visualization. The ability to not only visualize but to manipulate and analyze 3D structures from captured multidimensional image data, is vital to a number of diagnostic and therapeutic applications. *3D Imaging in Medicine, Second Edition*, unique in its contents, covers both the technical aspects and the actual medical applications of the process in a single source. The value of this technology is obvious. For example, three dimensional imaging allows a radiologist to accurately target the positioning and dosage of chemotherapy as well as to make more accurate diagnoses by showing more pathology; it allows the vascular surgeon to study the flow of blood through clogged arteries; it allows the orthopedist to find all the pieces of a compound fracture; and, it allows oncologists to perform less invasive biopsies. In fact, one of the most important uses of 3D Imaging is in computer-assisted surgery. For example, in cancer surgery, computer images show the surgeon the extent of the tumor so that only the diseased tissue is removed. In short, 3D imaging provides clinicians with information that saves time and money. *3D Imaging in Medicine, Second Edition* provides a ready reference on the fundamental science of 3D imaging and its medical applications. The chapters have been written by experts in the field, and the technical aspects are covered in a tutorial fashion, describing the basic principles and algorithms in an easily understandable way. The application areas covered include: surgical planning, neuro-surgery, orthopedics, prosthesis design, brain imaging, analysis of cardio-pulmonary structures, and the assessment of clinical efficacy. The book is designed to provide a quick and systematic understanding of the principles of biomedical visualization to students, scientists and

researchers, and to act as a source of information to medical practitioners on a wide variety of clinical applications of 3D imaging.

Saved-Edward Bond 2014-01-08 Described by its author as 'almost irresponsibly optimistic', *Saved* is a play set in London in the sixties. Its subject is the cultural poverty and frustration of a generation of young people on the dole and living on council estates. The play was first staged privately in November 1965 at the Royal Court Theatre before members of the English Stage Society in a time when plays were still censored. With its scenes of violence, including the stoning of a baby, *Saved* became a notorious play and a cause célèbre. In a letter to the Observer, Sir Laurence Olivier wrote: '*Saved* is not a play for children but it is for grown-ups, and the grown-ups of this country should have the courage to look at it.' *Saved* has had a marked influence on a whole new generation writing in the 1990s. Edward Bond is "a great playwright - many, particularly in continental Europe, would say the greatest living English playwright" (Independent)

Computer Interpretation of Imperfect Line Data as a Three-dimensional Scene-Gilbert Falk 1970 The paper describes a heuristic

science description program. This program accepts as input a scene represented as a line drawing. Based on a set of known object models the program attempts to determine the identify and location of each object viewed. The most significant feature of the program is its ability to deal with imperfect input data. Also presented are some preliminary results concerning constraints in projections of planar-faced solids. It is shown that for a restricted class of projections, 4 points located in 3-space in addition to complete monocular information are sufficient to specify all the visible point locations precisely.
