Asian Americans and the Media - Kent A. Ono 2019-12-18 Asian Americans and the Media provides a concise, thoughtful, critical and cultural studies analysis of U.S. media representations of Asian Americans. The book also explores ways Asian Americans have resisted, responded to, and conceptualized the terrain of challenge and resistance to those representations, often through their own media productions. In this engaging and accessible book, Ono and Pham summarize key scholarship on Asian American media, as well as lay theoretical groundwork to help students, scholars and other interested readers understand historical and contemporary media representations of Asian Americans in traditional media, including print, film, music, radio, and television, as well as in newer media, primarily internet-situated. Since Asian Americans had little control over their representation in early U.S. media, historically dominant white society largely constructed Asian American media representations. In this context, the book draws attention to recurring patterns in media representation, as well as responses by Asian America. Today, Asian Americans are creating complex, sophisticated, and imaginative self-portraits within U.S. media, often equipped with powerful information and education about Asian Americans. Throughout, the book suggests media representations are best understood within historical, cultural, political, and social contexts, and envisions an even more active role in media for Asian Americans in the future. Asian Americans and the Media will be an ideal text for all students taking courses on Asian American Studies, Minorities and the Media and Race and Ethnic Studies.

Star Trek and History-Nancy Reagin 2013-03-18 A guide to the history that informs the world of Star Trek—just in time for the next JJ Abrams Star Trek movie For a series set in our future, Star Trek revisits the past constantly. Kirk and Spock battle Nazis, Roman gladiators, and witness the Great Depression. When they're not doubling back on their own earlier timelines, the crew uses the holodeck to spend time in the American Old West or Victorian England. Alien races have their own complex and fascinating histories, too. The Star Trek universe is a sci-fi imagining of a future world that is rooted in our own human history. Gene Roddenberry created a television show with a new world and new rules in order to comment on social and political issues of the 1960s, from the Vietnam War and race relations to the war on terror and women's rights. Later Star Trek series and films also grapple with the issues of their own decades: HIV, ecological threats, the collapse of the Soviet Union, and terrorism. How did Uhura spur real-life gender and racial change in the 1960s? Is Kirk inextricably linked with the mythical Old West? What history do the Klingons share with the Soviet Union? Can Nazi Germany shed light on the history and culture of the Cardassians? Star Trek and History explains how the holodeck is as much a source for entertainment as it is a historical teaching tool, how much of the technology we enjoy today had its conceptual roots in Star Trek, and how by looking at Norse mythology we can find our very own Q. Features an exclusive interview with Nichelle Nichols, the actress behind the original Lt. Uhura, conducted at the National Air and Space Museum Explains the historical inspiration behind many of the show's alien races and storylines Covers topics ranging from how stellar cartography dates back to Ancient Rome, Greece, and Babylonia to how our "Great Books" of western literature continue to be an important influence to Star Trek's characters of the future Includes a timeline comparing the stardates of Star Trek's timeline to our own real world history Filled with fascinating historical comparisons, Star Trek and History is an essential companion for every Star Trek fan.

Bird Girl and the Man Who Followed the Sun - Velma Wallis 1997-09-12

With the publication of Two Old Women, Velma Wallis firmly established herself as one of the most important voices in Native American writing. A national bestseller, her empowering fable won the Western State Book Award in 1993 and the Pacific Northwest Booksellers Association Book Award in 1994. Translated into 16 languages, it went on to international success, quickly reaching bestseller status in Germany. To date, more than 350,000 copies have been sold worldwide. Bird Girl and the Man Who Followed the Sun follows in this bestselling tradition. Rooted in the ancient legends of Alaska's Athabaskan Indians, it tells the stories of two adventurers who decide to leave the safety of their respective tribes. Bird Girl is a headstrong young woman who learned early on the skills of a hunter. When told that she must end her forays and take up the traditional role of wife and mother, she defies her family's expectations and confidently takes off to brave life on her own. Daagoo is a dreamer, curious about the world beyond. Longing to know what happens to the sun in winter, he sets out on a quest to find the legendary "Land of the Sun." Their stories interweave and intersect as they each face the many dangers and challenges of life alone in the wilderness. In the end, both learn that the search for individualism often comes at a high price, but that it is a price well worth paying, for through this quest comes the beginning of true wisdom.

Star Trek - Duncan Barrett 2016-08-05

In a world shrunk by modern transport and communication, Star Trek has maintained the values of western maritime exploration through the discovery of ‘strange new worlds’ in space. Throughout its fifty-year history, the ‘starry sea’ has provided a familiar backdrop to an ongoing interrogation of what it means to be human. This book charts the developing Star Trek story from the 1960s through to the present day. Although the core values and progressive politics of the series’ earliest episodes have remained at the heart of Star Trek throughout half a century, in other ways the story it tells has shifted with the times. While The Original Series and The Next Generation showed a faith in science and rationalism, and in a benign liberal leadership, with Deep Space Nine and Voyager that ‘modern’ order began to decline, as religion, mental illness and fragmented identities took hold. Now fully revised and updated to include the prequel series Enterprise and the current reboot film series, this new second edition of Star Trek: The Human Frontier – published to coincide with Star Trek’s golden jubilee celebrations – addresses these issues in a range of cultural contexts, and draws together an unusual combination of expertise. Written to appeal to both the true Trekker and those who don’t know Star Trek from Star Wars, the book explores and explains the ideas and ideals behind a remarkable cultural phenomenon.

**On Film**-Stephen Mulhall 2015-12-14 The first edition of Stephen Mulhall's acclaimed On Film was a study of the four Alien films, and made the highly original and controversial argument that films themselves can philosophise. In its second edition, On Film increased its breadth and vision considerably to encompass films such as the Mission: Impossible series and Steven Spielberg's Minority Report. In this significantly expanded third edition Stephen Mulhall adds new chapters on the Jason Bourne films, the fourth Mission: Impossible movie, JJ Abrams' Star Trek and Star Trek: Into Darkness, and Ridley Scott's Prometheus (in which he returns to the Alien universe he created). In so doing, Mulhall reappraises in fascinating ways the central issues taken up in earlier editions of On Film: the genres of science fiction and thriller, the impact of digital as opposed to photographic modes of technology on the nature of cinema as a medium (and its relation to television), and the fate of sequeldom in mainstream contemporary cinema (with its emphasis on remakes, reboots and multi-media superhero franchises). On Film, third edition is essential reading for anyone interested in philosophy, film theory and cultural studies, and in the way philosophy can enrich our understanding of cinema.

**Dancing Hands**-Margarita Engle 2019-08-27 Winner of the Pura Belpré Illustrator Award A Kirkus Reviews Best Picture Book In soaring words and stunning illustrations, Margarita Engle and Rafael López tell the story of Teresa Carreño, a child prodigy who played piano for Abraham Lincoln. As a little girl, Teresa Carreño loved to let her hands dance across the beautiful keys of the piano. If she felt sad, music cheered her up, and when she was happy, the piano helped her share that joy. Soon she was writing her own songs and performing in grand cathedrals. Then a revolution in Venezuela forced her family to flee to the United States. Teresa felt lonely in this unfamiliar place, where few of the people she met spoke Spanish. Worst of all, there was fighting in her new home, too—the Civil War. Still, Teresa kept playing, and soon she grew famous as the talented Piano Girl who could play anything from a folk song to a sonata. So famous, in fact, that President Abraham Lincoln wanted her to play at the White House! Yet with the country torn apart by war, could Teresa’s music bring comfort to those who needed it most?

The Adventure Gap - James Edward Mills 2014-09-24 • Chronicles the first all-African American summit attempt on Denali, the highest point in North America • Part adventure story, part history, and part argument for the importance of inspiring future generations to value nature The nation’s wild places—from national and state parks to national forests, preserves, and wilderness areas—belong to all Americans. But not all of us use these resources equally. Minority populations are much less likely to seek recreation, adventure, and solace in our wilderness spaces. It’s a difference that African American author James Mills addresses in his new book, The Adventure Gap: Changing the Face of the Outdoors. Bridging the so-called “adventure gap” requires role models who can inspire the uninitiated to experience and enjoy wild places. Once new visitors are there, a love affair often follows. This is important because as our country grows increasingly multicultural, our natural legacy will need the devotion of people of all races and ethnicities to steward its care. In 2013, the
first all-African American team of climbers, sponsored by the National Outdoor Leadership School (NOLS), challenged themselves on North America’s highest point, the dangerous and forbidding Denali, in Alaska. Mills uses Expedition Denali and its team members’ adventures as a jumping-off point to explore how minority populations view their place in wild environments and to share the stories of those who have already achieved significant accomplishments in outdoor adventures—from Mathew Henson, a Black explorer who stood with Peary at the North Pole, to Kai Lightner, a teenage sport climber currently winning national competitions. The goal of the expedition, and now the book, is to inspire minority communities to look outdoors for experiences that will enrich their lives, and to encourage them toward greater environmental stewardship.
